10 Must-See Booths at Art Basel Miami Beach

ABMB23, Galleries, Public Interactions, Canada, PR, MC

Canada

For its Kabinett contribution, New York's Canada gallery highlighted the bluish-black-and-white ceramics and vibrant watercolours of Elisabeth Kley in a site-specific installation called "Café Cleopatra." The New York-based artist's works flank the booth's entrance, where her whimsical architectural patterning forms an eye-catching hand-painted mural. From ancient Egyptian design and the Wiener Werkstätte to modern art and drag performances, the inspiration for Kley's geometric and plant motifs runs the gamut.

The gallery's highly graphic works continue upon stepping inside the booth, where Joan Snyder's mixed-media canvases, Luke Murphy's LED patterned towers, Katherine Bernhardt's trippy acrylic and spray-paint creations, and Scott Reeder's *Miami Vice*-hued paintings are just a smattering of the works that deliver an explosion of colour.
